

MOHAMED SIRAJUDEEN, WAHITH ALI

Cloud Native Software Technical Lead with expertise in delivering complex projects in banking and insurance. Proficient in Microsoft Azure, AWS, and API management. Specializes in scalable microservices and Agile methodologies, leading teams to automate deployment and enhance operational efficiency.

EXPERIENCES

- Senior Software Developer**
Luxoft, a DXC Technology Company Hong Kong
 - Lead a team on sustainable investment and ESG projects for regulatory reporting.
 - Design and implement Cloud native backend services and data engineering modules, automating deployments for efficient reporting.
 - Oversee team performance and onboarding of microservices, ensuring compliance with security policies.
- Senior Associate**
Cognizant Technology Solutions Hong Kong
 - Oversaw requirements specification and design as Onsite Tech Lead, mentoring the team.
 - Aligned business needs with ESB implementation and integrated CRM systems and REST APIs.
 - Generated forecasts and developed POCs to validate the API management framework.
- Senior Associate**
Cognizant Technology Solutions Shenzhen, China
 - Led requirement gathering and development of new features, enhancing support for existing functionalities.
 - Mentored team members on technical challenges, fostering collaboration and improving project efficiency.
- Associate**
Cognizant Technology Solutions Shenzhen, China
 - Gathered and analyzed requirements to drive the development of new features while supporting existing functionalities.
 - Assisted team members with technical challenges, ensuring smooth project execution and knowledge sharing.
- Programmer Analyst**
Cognizant Technology Solutions TamilNadu, India
 - Collaborated on developing new requirements to enhance application functionality and user experience.
 - Provided ongoing support for existing applications and managed incident tickets to ensure prompt issue resolution.

SELECTED PROJECTS

- Sustainable Investment Calculation Engine**
UBS
 - Lead a development team on sustainable investment and ESG projects for regulatory reporting (SFDR) in Wealth and Asset Management, implementing data engineering modules with Azure technologies for both online and batch report generation.
 - Automate deployment processes using various tools, including Ansible and ARM templates, while creating microservices with Reactive Streams and Domain Driven Design (DDD), and designing optimized NoSQL schemas with Azure Cosmos DB.
 - Onboard microservices in Azure Kubernetes Service (AKS), optimize costs through cluster auto stop/start scheduling, and design MERs to meet security policies and regulatory requirements for UAT and PROD deployments.
- Personal Loan Origination System**
China CITIC Bank
 - As Onsite Tech Lead, gathered requirements and oversaw the design, coding, and integration of the LOSP application for personal loans while liaising with clients and stakeholders for support.
 - Designed BPM workflows for application processing, including verification and loan disbursement.
 - Integrated the application with the I-banking system for user notifications.

EDUCATION

- Bachelor of Engineering in Electronics and Instrumentation Engineering**
Anna University TamilNadu, India

CERTIFICATIONS

- [Project Management Professional \(PMP\)®](#) (Apr 2024)
- [Microsoft Certified: Azure Fundamentals](#) (Mar 2022)
- [Oracle Certified Professional, Java SE 6 Programmer](#) (Nov 2012)
